✱ E. JOSEPH H. B. M. S. D. T. S.
O. R, A N
ALMANACK

For the Year of our Saviour's Incarnation,

1 6 9 6.

And from the Creation, according to the best of
History, 5645.

It being the Bissextile, or Leap-year

Wherein is contained,

Astronomical, Astrological and Meteorological Ob-
servations, Lunations, Eclipses, the Diurnal Moti-
ons of the Planets, remarkable Conjunctions,
Tables of the Sun's Rising, Length of Day and
Breadth of Day for every sixth Day of the Year,
Judgment on the four Quarters and Monthly
Observations.

A Table of Houses for the Latitude of 52 Degr.
44 Min. for the Meridian of *Norwich*; a Table
of the Moon's Age, Tide Tables, with other
Things remarkable, and the Rising Setting and
Southing of the fix'd Stars, whereby may be
known the Hour of the Night; also a Table of
the Moon's Southing, the Latitude of the Planets
and the Declination of the Sun, &c.

Calculated for the Meridian of *Norwich*, whose
Longitude is 20 d. 10 m. Lat. 52 d. 44 m.

By JOHN TAYLOR, Student in the Ma-
thematics and Astrology.

And God said, Let there be lights in the firmament of heaven
and let them be for signs and for seasons, for days and
for years, Gen. 1. 14.

London, Printed by H. Clark for the Company
of Stationers. 1696.

To the Inhabitants of Norwich and Norfolk.

TIS necessary that I inform you, That this Ephemeris is the Product of some spare Hours; and if it prove any way advantageous to my Friends, the Inhabitants of Norwich, I shall look on my self as amply satisfied by their kind Acceptation. 'Tis with the Encouragement of some of them that I have thus far adventured to expose my Name, and, I hope, from the Encouragement of the rest, I shall have no occasion given me to repent my Undertaking. And I have this to say in my own Vindication, That it was not Ambition moved me to it, but purely a Desire of doing my Countrymen a Piece of Service. The Study of Astrology hath been very Delightful and Diverting to me; and since I have made so considerable a Progress in it, I could not but present my Country with the Effects. You have here a very copious Almanack, as you find by the Title, and a very plain, as you may find by its use; however, if it is acceptable, and I find further Encouragement by the Sale, I shall next Year present you with the Second Edition, which shall be corrected, and have several Additions, which the Shortness of the Time now would not admit.

Vale.

The Proem or Introduction.

FORasmuch as many or most Persons are ignorant in the use of an *Ephemeris* or Almanack, I thought it not unreasonable, in this Place, to let them know, That an *Ephemeris* or *Ephemerides*, in an Astrological sense, is only a plain methodical Table, exhibiting the Planets various Motions and Aspects, accomodated to each Day of the Year: For the better understanding of which take this brief Explanation.

First then, you must know, there are seven Planets constantly moving in the Heavens, and are therefore called *Erratique Stars*. Secondly, That there are also Twelve Signs, into which the Heavens are divided; in and through which Signs these Seven Planets constantly move and pass. Thirdly, note, That there are Five Aspects which these Seven Planets do make each with other in these Twelve Signs, according to their several Distances. Fourthly, there is the Head and Tail of the Dragon, commonly called the Moons North and South Node, the former of which is noted in the Tractate, whereunto the latter is always opposite. Now the several Planets, Signs and Aspects are known by the following Name and Characters: and first of the Seven Planets.

The Proem or Introduction.

| | |
|-----------|-------------------------------|
| ♄ Saturn | ♀ Venus |
| ♃ Jupiter | ☿ Mercury |
| ♂ Mars | ☾ Luna |
| | ♁ & Dragons Head and Tail. |

These are the Names and Marks that we know
the Seven Planets by.

The Names and Characters of the Twelve Signs.

| | | |
|----------|-----------|-------------|
| ♈ Aries | ♌ Leo | ♐ Sagittary |
| ♉ Taurus | ♍ Virgo | ♑ Capricorn |
| ♊ Gemini | ♎ Libra | ♒ Aquary |
| ♋ Cancer | ♏ Scorpio | ♓ Pilces |

The Five Aspects.

| | | |
|---------------|----------|--------------|
| ♌ Conjunction | ☐ Square | ☿ Trine |
| * Sextile | | ♁ Opposition |

That my Directions may be plain and metho-
dical, I shall give a compleat and plenary Exam-
ple in the Month of *January*.

The Left-hand page.

The Left-hand page consists of 12 Rows or
Columns: The 1 contains the Days of the Month,
the 2 the Week-days, the 3 Festivals; in the 4
Column you will find the *Suns* place in signs, de-
grees

The Proem or Introduction.

degrees and minutes each day of the whole month :
As for Example ; the *Sun* is in *Capricorn*, 21 deg.
26 min. the first day as the Letters d and m at the
top denotes, and continues in *Capricorn* until the
10th day, then he enters *Aquary*, &c. In the 3 Co-
lumn you have the place of the *Moon* for every
day of the month in signs, deg. and min also.
The 6 Column shews the place of *Saturn* in deg.
The 7 of *Jupiter*, the 8 of *Mars*, &c. At the
Top you have the latitudes or distances of the
Planets from the *Ecliptick*, for every tenth day,
and also what Planets are with, or may be seen
with the *Moon* the month throughout, &c.

The Right-hand-page explained.

The Right-hand-page consists of 9 Spaces ,
Rows or Columns ; the 1 whereof holds the days
of the month ; the 2 informs you of what Aspects
the *Moon* makes with the *Sun* and other Planets, as
is intimated by the Title, *Lunar Aspects*, as in
Example, on the 1st day of *January*, under *Sol*
you will find square, and so under it, which will
tell you, that the *Moon* comes to a square Aspect
of the *Sun* at Noon, &c. the 8 contain all the
grand Aspects which the Planets make among
themselves. The rest shall be explain'd elfw here.

*Pallas assist while I do trace the Sphere,
To find out what shall happen in this Year :
I have here studied how to serve in part,
And now do send you what here's drawn from Art.*

Note Vulgares.

O R,

The Use of the ensuing Tide-Table.

TO find the Time of Full Sea or High-Water in any of the Places mention'd in the ensuing Tables, you are to observe, first, the Age of the Moon, which you are to find in the following Table; wherein you have the Moons Age for every Day in the Year. Then having found the Moon's Age, have recourse unto the said Tide-Tables, and look for the Place desired in the Head of the said Tables, with the Age of the Moon, under the Title of the *Moons Age*, and in the common Area or Angle of Meeting you shall have the Time of High-Water in Hours and Minutes.

A Table of the Moon's Age for every Day throughout this Year 1696. Whereby, with the Help of the ensuing Tide-Table, the Time of High-Water and Full Tide may be found in those Places there inserted, by an ordinary Capacity.

Observations

Seven Stars South 40 m. past 1 at night, and sets 54 m. past 1 in the m.
 In this Month will happen a notable configuration of the Stars, and divers Oppositions very considerable
Lions Heart South 27 m. past 1 at Night, and 40 m. past 6 in the mor.
Great Dog-Star South 43 m. past 7 at n'g't, and sets 14 m. past 12 at night.
Viz. An Opposition of *Mars* and *Mercury*, of the *Sun* and *Mars*, of *Jupiter* and *Mercury*, all from *Virgo* and *Pisces* — And *Mars* by his retrograde Motion comes out *Virgo* into *Leo* — Hence we may judge, Whereas *Mars* comes out of *Virgo* into *Leo*, it signifies the marching of Armies or an Army out of one Country into another — And it would not be amiss if I should say, out of some Countries or Country under *Virgo* into another under the Domition of *Leo*. Several Reports from beyond Sea is also intimated hereby. And whereas there are 3. Oppositions from *Virgo* and *Pisces*, I signify both and D triment to such Countries as are under those Constellations of Heaven.

Observations.

Antares South 39 m. past 4 in the Morning, and rises near 1 in the Morning.

Notable Configurations are in this Month also, and in an active posture against the Countries aforesaid, yet the Face of Heaven is changed from what it was and looketh not so angry as it did the last Month. The Sun, that was opposed by Mars, is now applying to him by a Trine, which is an Aspect of Love and Amity.

The 9th Virgins Spi & South 11 minutes past 1 in the Morning, and rises 58 minutes past 7 at Night.

Arcturus South 29 minutes past 2 morn. and rises half an hour past 5 at Night.

North Balance South 57 minutes past 1 in the Morning, and rises 37 past 8 at Night.

Lions-Heart South 40 minutes past 8 at Night, and sets about 4 in the Morning.

Virgins Spick South 32 min
 past 11 at noon, and sets 4
 32 min. after 4 morn.
 Were it not that the turbulent
 Configurations of the Last
 Months, *(viz. Jan, Feb & March)*
 did seem to operate and break
 forth, the Actions of this Month
 3 Arctur & Sou. 2 min. afr. mid. n.
 39 and sets 3 m.p. 8 in the morning
 Per. might be expected to be of a
 D. 3 pretty calm nature: ☽ is in Δ
 32 to ☉, and ☉ is in Δ to ♊ an
 40 ♊ is in * to ♋, and ☽ is in Δ
 38 to ♋, and at the Lunation ☽
 27 and ♋ are in the Tenth House
 M. 597 Stars rises 8 m. past 5 morn
 9 e l sets 26 m. past 9 at night.
 15 in ♊, and ☽ in ♋ in the Af-
 cendant, and ☉ Lord thereof.
 However, several Debates ap-
 pear in the world, and matters
 very considerable, seem now
 under Consideration in some
 parts of Europe. B

Observations.

[illegible]

In this month here is also an appearance of Friendly Overtures between Country and Country, and many Treaties carried on. There is no less than 6 aspects of Love and Amity
 [South Bal. South 38 min. past 9 at n. and set 18 m. past 5 idm. North Bal. Sou. 15. p. 10 n. and set 33 m. past 3 in the m.]
 between heavenly bodies; doubtless peace will decide the
 [Antares South about 11 at n.]
 tale between many Kingdoms and Countries &c

June back XXXX days. Latitude of Planets.

The Weather.

The Month begins with reasonable weather.

Thunder and Lightning may be expected in many places after the Full Moon.

Fair and pleasant about this time.

Good seasonable weather now also.

Moderate and pleasant weather, and cool winds now also till after the New Moon.

Pretty good Harvest weather about this time is promised Unconstant weather or er about this time, inclining to moisture.

Seasonable towards the end.

August 1696.

Observations.

Canis Major, or the Great Dog, rises 32 m. past 8 at night, and South at 1 in the morn. There will happen famous Configurations of the Planets this Month.

Canis Minor, or *Leffer Dog*,
South 32 m. past 1 in the mora.
In this Month will happen a
famous Conjunction of *Saturn*
and *Mars*: and its Effects will
also be famous.

Cor. Ω , or *Lions Heart*, rises
25 m. past 5 at night. *Pleiades*
sets 15 m. after 5 in the morn.
Aldebaran South.

Had it not been so late in the Year, I know not but it might have had as great an Influence, as to Martial or Warlike Affairs, as the great Oppositions of *Saturn* and *Jupiter* in *Augo* 1693. But, however, its Operation will be turbulent to such Persons and Kingdoms as are under the Dominion of *Capricorn*, the *Sign* wherein this Conjunction is made.

But more of this next Year.

Of the Eclipses of the Luminaries for the Year 1696.

NO less than five times will the Inhabitants of this Globe of Earth be deprived of the Light of the *Sun* and *Moon* in this Year, viz. three of the *Sun*, and two of *Moon*. In manner following.

1. The first will be a *solat deliquium* on *April 21.* about Eleven in the Forenoon. It will be a very small Eclipse, and scarce worthy the mentioning.

2. The second will be of the lesser Light, the *Moon*, on *May 6.* about our Twelve of the Clock. It will be celebrated in the 27th Degree of the Martial Sign *Scorpio*. And its Effects will (doubtless) be Martial also. The *Moon* loseth her Light on the very Cusp of the *Angle* of Honour. It will be a visible and total Eclipse, almost central.

3. The third will be a defect of the *Sun* on *May 20th.* Day, about our Ten of the Clock at Night; and therefore invisible as to us, but may be seen in the Hemisphere of our *Antipodes*, It will be a small Eclipse nowhere.

4. The fourth will be of the *Moon* on *October* the 30th. Day, the middle or greatest Obscuration, at our Four of the Clock in the Morning. It will be a total Eclipse, and greater than that of the *Moon* in *May*: For the *Moon* loseth her Light in the *Right Angle* of the *Heavens*, exactly in her *Southern Node*, in the *Nineteenth Degree* of *Taurus*. Doubtless its Effects will be more than ordinary.

5. The fifth will be of the *Sun* on *November* the 24th. Day, at Six at Night; and therefore invisible to us: But it may be seen in some of the South-West Countries.

The next Year I'll show you the Cause and Signification of an Eclipse at large.

Judgment

Judgment on the 4 Quarters of the Year, 1698. and first of
the Winter Quarter.

THE Winter Quarter begins when the Sun toucheth
the first Scruple of the Tropical Sign *Capricorn*, which
this Year, according to the best Observations and ex-
actest Tables that I know of, falleth on December the 11th.
29 min. 30 sec. before Noon: At which time the *Coelestial*
Fish is Horoscopical, and her Lord in the 7th House in
Square to the Sun in the Mid-Heaven: Five of the Planets
are above the Earth, and Mars but just down. The Moon
is in the Fifth, in δ h, and $\ast \delta$, and absenting from an
Opposition of the Sun, and Mars in the Sixth, in Square
to Mercury; the Lord of the Ascendant is in Sextile to
Venus, and soon after is in Sextile to the Moon also.

Judicium Astrologicum pro Anno 1696

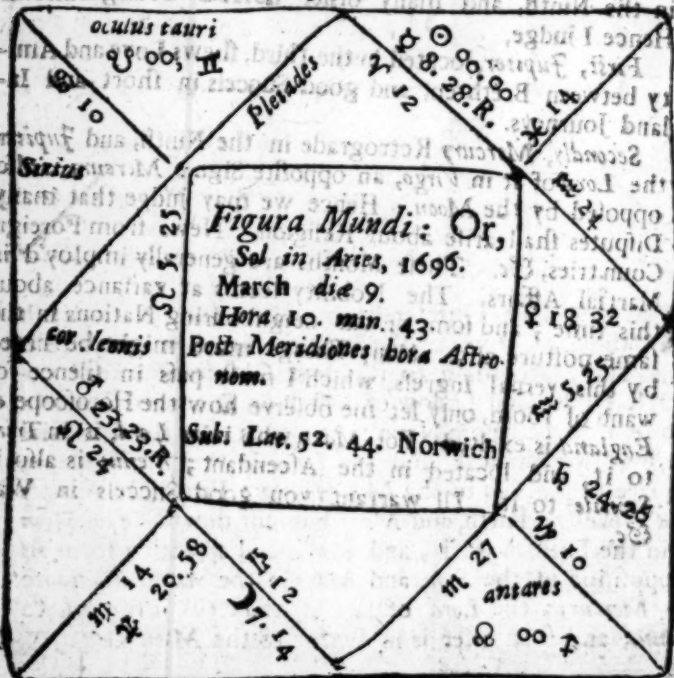

First, Saturn in the Eleventh House portends much strife between Man and Man, and especially between Friends: Because the Eleventh House is a general Significator of Friendship.

Secondly, Whereas the Moon is strong in Cancer, and in the Fifth in Sextile to Jupiter, and in Trine to Venus, Lady of the Second, it foretshews Health and Prosperity to the common People in general.

Thirdly, Whereas Mercury is in the Eighth, in Square to Mars in the Sixth, and in Opposition to Aldebaran, a notable fixt Star of this nature: also it denotes much false news and fraudulent Stories, Robbing and Purlowing, &c.

Here are also great Matters of Concern in agitation, by the better sort, which I omit for want of room.

Of the Spring Quarter.

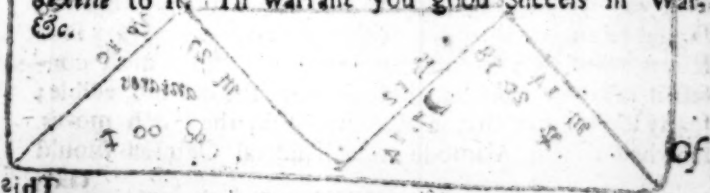

This.

This Quarter takes its beginning at such time as the Sun toucheth the First Scruple of the Cardinal and Equinoctial Sign *Aries*, which maketh equal Day and Night to all Parts of the inhabited World; and according to the truest and best Astronomical Tables, this Year will take its beginning on *March 9. 43 minutes past mid-day*, as you may see by the Calculation of the Sun's place in the the last Page, which is according to the exactest Astronomical Table: At which time the Fifth Degree of *Leo* or the *Lion* ascends in the Meridian of *Norwich*, and the twelfth Degree of *Aries* or the *Ram* culminates. This vernal Ingress is attended with an Opposition of *Mars* and *Venus* from *Angles*, viz. from the Ascendant and Seventh Houses. Here is also a Conjunction of *Mars* and the Sun in the Ninth, and many other notable Configurations. Hence I judge,

First, *Jupiter*, located in the third, shews Love and Amity between Brethren, and good Success in short and Inland Journeys.

Secondly, *Mercury* Retrograde in the Ninth, and *Jupiter* the Lord of it in *Virgo*, an opposite Sign; *Mercury* is also opposed by the Moon. Hence we may judge that many Disputes shall arise about Religion. News from Foreign Countries, &c. These Months are generally employ'd in Martial Affairs. The Nobility seems at variance about this time; and some of our neighbouring Nations in the same posture also. Many Things more might be noted by this vernal Ingress, which I must pass in silence for want of room, only let me observe how the Horoscope of *England* is exalted. For *Mars*, who is its Lord, is in Trine to it, and located in the Ascendant; *Venus* is also in Sextile to it. Ill warrant you good Success in War, &c.

Judicium Astrologionum pro Anno 1696.

Of the Summer Quarter!

This Quarter begins at such time as the *Sun* toucheth the first Scruple of the Tropical and Cardinal Sign *Capricorn*, according to the true Planetary and Ptolomaick System; and not when this Globe of Earth involves her Northern Inhabitants towards the South, 23 deg. 30 min. as some of our *Calendarians* and others would have it; who say that the *Sun* standeth still in a manner, and the *Earth* moves: And also that the *Moon* and *Stars* stand still and are inhabited, and we continually move. Surely then we live in a strange World (over them) that we should be turn'd with our Arses upward every twenty four Hours, when they keep at one Station. But I must confess it is a new Opinion, and therefore the more Credible; for it looks great that a Man should say the Earth moves. Howbeit if this Alamode and Ethnical Opinion should take,

take, we must (I presume) turn the North Pole out of doors: For how is it possible that the Earth should involve North and South (as they say) without the North Pole, or Pole Artique, should be nearer the Horizon at one time than at another. This seems to confound the whole story: but they'll say, that it is not perceived, because the Earth moves by little and little. Pray let such Star-gazers answer another Question; If the Earth moveth North and South, howbeit that the Fixed Stars who never alter their Latitudes, should Rise and Set always in one Point of the Horizon

This being the first Impression I shall not trouble myself any more with it now, but the next year you may hear of me again in a more methodical manner; for it seems rude in a young beginner to correct old Authors.

And now I come to the matter intended; which is to give Judgment on the Figure.

This Summer Quarter will take its beginning this year on June the Tenth, 2 hours, 25 min. past Noon. At which time the 25th. deg. of *Libra*, or the balance, ascends in the Meridian of *Norwich*: and the 4th. degree of *Leo*, or the Lion culminates. This Tropical Ingress is attended with a Conjunction of *Mars* and *Jupiter*, in the 11th. House of Heaven, and *Saturn* in the third R. in opposition to *Mercury* in the ninth. Here People are generally unfortunate in Voyages, long and short Journeys: Here comes also false and fraudulent Stories, also ill Success to Seamen. Here the Common People have bad Success; Brethren disagree, and the humours in Men's Bodies are generally suitable to the season. The Diseases incident to Nature this Quarter are Frensies, Inflammations, Imposthumes, Burning Feavers, Ulcerations of Lungs and Bladder, heat in the Reins, *Gonorrhæa*, Illiack Passions, and such like Diseases as proceed from Choler, &c.

Of
floweth
that a
the Earth
Opinion
should
take

Judicium Astrologicum pro Anno 1696.

Of the Autumn or Harvest Quarter

THE Harvest or Autumn Quarter commenceth at such time as the Sun toucheth the first Scruple of the Equinoctial and Cardinal Sign *Libra*, and crosses the Equator or Equinoctial Circle; at which time he maketh equal Day and Night, to all that inhabit this Globe of Earth, which this Year happeneth on September 12. 58 m. past 3, in the Morn. at which time the 29th of *Virgo* ascends in the Meridian of *Norwich*, and the 29 h of Π culminates Ψ the Sun, Υ and Ω altogether in the Ascendant, and *Mars* in the Second: there is none above the Earth but the Moon. *Saturn* is ret. ad direction in the Fourth. There happens also in this Month a *Trine* of *Saturn*, and of *Saturn* and *Mercury*, a *Sextile* of *Saturn* and *Mars*.

Next Year you may expect it more correct,

From my House near
the Market-Place
in *Norwich*.

From yours,
John Taylor.
